

## **Business and Non-Instructional Operations**

### **Hazardous Materials in Schools**

#### **Pesticide Application**

The intent of this policy is to ensure that students, employees and parents/guardians receive adequate notice, in conformity with applicable statutes, prior to pesticide application in school buildings and on school grounds. Further, the District will only employ certified pesticide applicators for any non-emergency pesticide use in school buildings or on school grounds.

The application of lawn care pesticides on the grounds of schools with students in grade eight or lower must be according to an integrated pest management plan (IPM). Such application is prohibited starting July 1, 2010 except in emergencies. An emergency application may be made to eliminate a human health threat in any school with students through grade eight as determined by the Superintendent of Schools.

The District shall:

- Provide notice of planned pesticide application to students, parents/guardians and employees in the manner required by law.
- Post the areas scheduled to receive pesticide application(s).
- Maintain written records for five years of all pesticide applications.
- Inform annually parents/guardians and staff of the District's pest application/management policy.
- Establish a registry of parents/guardians and staff who want to receive advance notice of all pesticide use and provide such notice as required by law.

In case of pesticide applications performed for or by public health agencies or emergency applications because of immediate threat to the public health, the licensed applicator shall give the school site office oral and, if possible, written notice, with posting of the area to be treated.

The Superintendent or his/her designee may require the pest control applicator to make the required postings in accordance with all applicable statutes and with District policy and regulations. The name and address of the applicator shall be a part of any posting.

Someone other than a certified pesticide applicator may apply a pesticide in an emergency to eliminate an immediate human health threat when (1) it is impractical to obtain the services of a certified pesticide applicator and (2) a restricted use pesticide is not used, as defined in C.G.S. 22a-47.

Pesticide purchases shall be limited to amounts authorized by the Superintendent or his/her designee for use during the year. Pesticides shall be stored in a secure site not accessible to students or unauthorized staff. They shall be stored and disposed of in accordance with EPA registered label directions and applicable state statutes.

#### **Definitions**

**Pesticides** are defined as fungicides used on plants, insecticides, herbicides or rodenticides, but not sanitizers, disinfectants, antimicrobial agents or pesticide baits.

## **Business and Non-Instructional Operations**

### **Hazardous Materials in Schools**

#### **Pesticide Application**

**Integrated pest management** is the use of all available pest control measures, including the judicious use of pesticides when warranted to maintain a pest population at or below an acceptable level while decreasing the unnecessary use of pesticides. Such plan is consistent with an applicable model plan provided by the Commissioner of Environmental Protection under section 22a-66l.

**Lawn care pesticides** are pesticides registered by the EPA and labeled according to the Federal Insecticide, Fungicide and Rodenticide Act for lawn, garden and ornamental use.

The Superintendent shall prepare and disseminate regulations for the implementation of this policy.
