

Instruction

Gifted and Talented Students Program

The Board of Education (Board) recognizes its responsibility to identify gifted and talented students within the school district. (Districts are required to identify but provision of services is at the discretion of the local district.) The Board is committed to providing identification and assessment which is responsive to students' economic conditions, gender, developmental differences, disabling conditions and cultural diversity.

For purposes of this policy, "gifted and talented students" means a child identified by the Planning and Placement Team (PPT) as (A) possessing demonstrated or potential abilities that give evidence of very superior intellectual, creative or specific academic capability and (B) needing differentiated instruction or services beyond those being provided in the general education program in order to realize the child's intellectual, creative or specific academic potential. The term shall include children with extraordinary learning ability and children with outstanding talent in the creative arts.

For purposes of this policy "outstanding talent in the creative arts" means a child identified by the Planning and Placement Team as gifted and talented on the basis of demonstrated or potential achievement in music, the visual arts or the performing arts.

The Superintendent or his/her designee will develop procedures for an ongoing kindergarten through grade twelve identification process for gifted and talented students that includes multiple measures in order to identify student strengths in intellectual ability, creativity or a specific academic area.

Multiple measures may include, but are not limited to, tests of academic achievement, aptitude, intelligence, and creativity; achievement test scores; grades; student performance or products; samples of student work; parent, student, and/or teacher recommendations; and other appropriate measures. The identification methodology will include consideration of all students, including those who are English language learners and those with Individualized Education Plans (IEP) or 504 Plans, be developmentally appropriate, non-discriminatory, and related to the programs and services offered by the District.

The final determination in the identification of students as gifted and/or talented must be done by a PPT. Such PPT charged with this responsibility shall be composed of a group of certified or licensed professionals representing each of the teaching, administrative and pupil personnel staffs. The Planning and Placement Team (PPT) Subsection (1) of section 10-76d-9c of the RCSA requires "Each board of education to evaluate and identify gifted and talented children using the planning and placement team (PPT)." Evaluation and identification of gifted and talented students must be conducted by a PPT; however, the composition of the PPT for gifted and talented identification is different from the composition of the PPT for special education. Specifically, subsection (14) of section 10-76a-1 states that "For purposes of the evaluation, identification or determination of the specific educational needs of a child who may be gifted or talented, the PPT means a group of certified or licensed professionals who represent each of the teaching, administrative and pupil personnel staffs, and who participate equally in the decision making process." Note that the student's parent or guardian is not a required member of the PPT.

Though early identification of the gifted and talented is important, it is essential that the identification of these students be recognized as a continuing process in that special abilities and skills appear at different times in the lives of many children and new children are regularly being enrolled in the system.

Upon the identification of a student as gifted and talented, the District shall provide electronic notice of such identification to the parent/guardian of such student. Such notice shall include, but need not be limited to:

1. an explanation of how such student was identified as gifted and/or talented;
2. the contact information for the District's employee in charge of the provision of services to gifted and talented students, or, if there is no such employee, the District's employee in charge of the provision of special education and related services;
3. the employee at the State Department of Education who has been designated as responsible for providing information and assistance to Boards of Education and parents or guardians of students related to gifted and talented students, pursuant to section 10-3e of the General Statutes; and
4. any associations in the state that provide support to gifted and talented students.

The school district, should it decide to offer services to the gifted and talented, shall utilize the guidelines, developed and promulgated by the State Department of Education (SDE), for providing services to those students. The guidelines include best practices for the district to consider for (1) addressing the intellectual, social and emotional needs of gifted and talented students in schools and (2) providing teacher training and professional development on gifted and talented students.
