

Welcome to Honors Physical Science!

Summer Assignment (2023)

Hello students,

I am Ms. Fernandez and I will be your Honors Physical Science teacher next year. We often start units with a lab that we use to support the content covered in the unit. As a result, we end up doing a lot of hands-on work and experiments. Most experiments are analyzed using a set of mathematical skills that you have learned in your Algebra class. I think it is a good idea to review those skills over the summer so we can jump into doing experiments in the fall and we don't have to worry about being too rusty when school starts. We will do some of this analysis together the first time in the fall but very quickly you will be expected to be able to do it on your own. This assignment will help you get ready for it!

In order to organize the work, I have set up a **Google Classroom for the summer**. Please sign up as soon as possible so I can give you access to Edpuzzle to complete the assignment. Access code: **xvglej5**

NOTE: With the assignment, I have included the estimated time it would take to complete the work so you can budget time for it. If you have any questions, please reach out to me (yolanda.fernandez@stoningtonschools.org). **Don't wait until the last day of summer to ask questions.**

Don't forget to also enjoy your summer! ☀️
